

COSTSIMPLIFIED® VIRTUAL HEALTH RENTAL PROGRAM

At GlobalMed, we recognize the move to integrate telehealth technology into your practice will require an upfront investment. We also know that delivering virtual care can expand access to your patients, reduce costs, and increase revenues. Our CostSimplified® rental solution makes it possible for you to set up a virtual health program and reap its benefits quickly without a large capital expenditure.

WHY COSTSIMPLIFIED?

Low Entry Costs and Managed Cash Flow

Renting helps you avoid high initial costs –leaving you with more capital to invest. You get the latest equipment while managing your cash flow to be used on other projects that may not be as tax efficient.

Tax Deductible

Equipment rental payments are tax deductible. The entire rental payment is an operating expense and a claimable tax deduction against your business’s taxable profits. This can result in significant savings.

Quick Access to the Latest Technology

Whether you’re new to virtual care or upgrading your solution, renting enables you to buy high quality technology, integration and implementation services.

No Repair Risk or Training Costs

The CostSimplified rental program means no bills for unexpected system repair. The program includes all maintenance and repairs within the agreement term included in the price. Set up and training is also included.

WHY COSTSIMPLIFIED®	TRADITIONAL PURCHASE
Affordable Monthly Payment	Large Startup Capital Requirement
Operating Expense	Capital Expense
Up and running in 6-8 weeks	Longer lead times due to Capital approval process
Fully integrated software and hardware, plus world-class support	May involve Lower quality solutions from multiple providers
Includes cutting-edge connected medical devices	Add-ons and upcharges
Setup and training included	Training costs extra
GlobalMed manages remotely, including all upgrades	Technical headaches and outdated technology
